Summary

- Software Engineer with hands-on experience building full-stack web applications using the MERN stack, and applied experience as an LLM Post-Training Engineer evaluating and refining AI model outputs. Skilled in designing responsive user interfaces, building and integrating REST APIs, and working with modern databases and cloud-ready tooling. Comfortable working at the intersection of traditional software engineering and applied AI, with a strong focus on writing clean, maintainable, and production-ready code.

Technical Skills

Languages: Python, JavaScript, SQL, HTML5, CSS3
Frameworks & Libraries: React.js, Node.js, Express.js, Next.js, Tailwind CSS
Databases & Tools: MongoDB, Git, GitHub, REST APIs
AI/ML: LLM Post-Training, Agentic AI Workflows, OpenAI API

Projects

YR Realty – Real Estate Platform Live

- Built a full-stack real estate platform (React, TypeScript, Node.js, MongoDB) with secure user authentication, property listing management, and an admin dashboard for managing listings.
- Implemented advanced property search and filtering with a responsive UI, enabling users to browse properties by location, price, and category.
- Optimized performance through reusable components, efficient database queries, and custom subdomain configuration (admin.yrrealty.properties) via Vercel and Hostinger DNS.

AURA – Premium E-commerce Homepage

- Built a modern React + Vite homepage for a premium electronics brand with a gold/mauve design system using Tailwind CSS v4.
- Implemented interactive UI components with Framer Motion animations, bento-grid sections, parallax effects, and scroll-progress indicators.
- Delivered a pixel-perfect, responsive design optimized for conversion and user engagement across all devices.

Tomato – Food Ordering Website

- Built a full-stack food ordering application with user authentication, menu browsing, cart management, and online order placement.
- Implemented a responsive, interactive UI using React.js, ensuring a smooth experience across devices.
- Added real-time cart updates and order tracking, backed by efficient database operations for reliable performance.

Internship Experience

Ethara.AI | LLM Post-Training Engineer - Gurugram March 2026 - May 2026

- Contributed to Large Language Model (LLM) post-training workflows spanning data annotation, labeling, and categorization.
- Evaluated AI-generated outputs for accuracy, relevance, coherence, and guideline compliance.
- Conducted data validation, quality assurance, and benchmarking to maintain high-quality, reliable training datasets.

HAPSMAN - NaturAgro Harvest Pvt Ltd | Full-Stack Developer Intern - Noida Jan 2025 - Jan 2026

- Built and maintained full-stack web applications using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Designed responsive, interactive user interfaces in React.js and integrated RESTful APIs for seamless frontend-backend communication.
- Developed backend services with Node.js and Express.js, implementing CRUD operations and database management with MongoDB.

Achievements

- Improved LLM response evaluation accuracy by **25–30%** through systematic data annotation and quality assurance workflows at Ethara.AI.
- Drove model performance improvements of **20%+** by evaluating AI-generated outputs against strict compliance and accuracy standards.
- Deployed production-ready full-stack applications across multiple domains (real estate, e-commerce, food ordering) handling complex state management and real-time updates.
- Architected and maintained secure authentication systems, advanced search functionality, and admin dashboards supporting multi-user workflows.

Education

Greater Noida Institute of Technology, Greater Noida 2021 – 2025

- B.Tech. in Computer Science and Engineering | CGPA : 6.5
